The Cheeseboard art installation

The Cheeseboard is the third exhibition from award winning artists musson+retallick, created with the help of the local community as part of the Celebrating Halton's Heritage project.

The installation presents twelve Cheshire cheeses on a vast cheeseboard as a symbol for the rural trades that were important within Halton in the past. Cheshire cheese was once the fuel that fed local workers. Today there is only one Cheshire cheese maker remaining as working patterns and demands have changed.

The Cheeseboard brings this history to life through recorded stories and reflections on working life and a film of the artists making the cheese that is on display.

More about the artists can be found at mussonretallick.com

The project is supported by a grant from National Lottery Heritage Fund.
